

# Guillem Soler Suetta

Senior Backend Engineer — Fintech (Go/Java)

Buenos Aires, Argentina (GMT-3) — Hybrid • guillemsuetta@gmail.com • +41 77 481 1292 • [LinkedIn](#) •

[GitHub](#) • [Portfolio](#) • English: C1

## PROFESSIONAL SUMMARY

---

Senior Backend Engineer (~10 years) focused on Go/Java services for fintech/e-commerce. Build event-driven microservices on AWS/K8s, with idempotent APIs, DDD/outbox/SAGA, and Postgres/DynamoDB. Pragmatic about reliability (SLIs/SLOs) and latency.

## CORE COMPETENCIES

---

Languages: [Go](#) [Java](#) [TypeScript/Node.js](#) [Python](#)

Cloud & Infra: [AWS \(Lambda, API GW, SQS/SNS, EKS\)](#) [Kubernetes \(Helm/GitOps\)](#) [Terraform](#)  
[CI/CD \(GitHub Actions\)](#)

Data & Messaging: [PostgreSQL](#) [DynamoDB](#) [Kafka](#) [Redis](#)

Architecture & Reliability: [Event-driven](#) [Idempotency](#) [Outbox/SAGA](#) [DDD](#)  
[Observability \(Prometheus/Grafana, OpenTelemetry\)](#)

Security: [PCI awareness](#) [Tokenization](#) [AWS KMS/Secrets](#) [Audit logging](#)

## PROFESSIONAL EXPERIENCE

---

Senior Software Engineer Triesen, Liechtenstein (Hybrid/Remote)  
*Actus AG* Aug 2021 — Present

- Built backend services and automations to transform banking data and streamline accounting workflows (Go/Java/Node, Python).
- Designed resilient APIs/jobs with retries and idempotency keys; improved correctness and reduced manual interventions.
- Developed pipelines to normalize blockchain/Web3 transactions for tax/reporting, including reconciliation and FX rate handling.
- Drove cloud automation with Terraform and CI/CD; added dashboards/alerts to improve deployment reliability and security baselines.

Software Engineer Berlin, Germany  
*HelloFresh* Jan 2020 — Aug 2021

- Delivered customer and platform services (.NET/C#, React) backed by PostgreSQL and Kafka for event integrations.

- Operated services on Kubernetes with Docker; used Helm and GitOps (Flux) for safe, repeatable releases.
- Contributed IaC with Terraform and CI/CD to reduce lead time and improve rollout safety across environments.

Full-Stack Developer

Barcelona, Spain

*Wolters Kluwer*

Aug 2017 — Dec 2019

- Built B2B features across Java/Spring and .NET with Angular; integrated Azure services for scale and reliability.
- Implemented CI/CD, REST APIs and SQL optimizations to improve delivery and stability in an Agile team.

Web Software Developer

Barcelona, Spain

*Oxigen Salud*

May 2016 — Jul 2017

- Developed an MVC web app to monitor ambulance fleets (.NET, JavaScript, MS SQL) with real-time GPS tracking.

## KEY PROJECTS

---

### Credit Authorization & Ledger (reference)

Go microservices with idempotent authorization, transactional outbox, SAGA orchestration, retries/DLQ and tracing.

Technologies: [Go](#) [PostgreSQL or DynamoDB \(local\)](#) [Kafka or SQS/SNS](#) [Docker](#)

Links: [Repo](#)

### Tokenization Service (reference)

PAN/PII tokenization and detokenization with KMS-managed keys, RBAC, audit logging and redaction. Designed to minimize PCI scope.

Technologies: [Node.js/TypeScript](#) [AWS KMS \(or Vault\)](#) [PostgreSQL](#) [Docker](#)

Links: [Repo](#)

## EDUCATION

---

### Engineering — Telecommunications & Software

Universidad Autónoma de Barcelona

Barcelona, Spain • 2012 — 2016

## LANGUAGES

---

Spanish: Native

Catalan: Native

English: C1
